TERRA NOVA

“...reminiscent of the moon’s halo during a solar eclipse.”

Unlike other mirrors, which lie flat against the wall, the mirrors in this collection curve up and away from the wall up to eight inches, giving them a dramatic depth of presence. This unmatched collection of mirrors is illuminated from within for a luxurious and diamond-like glow. Different mirror styles will cast their own unique patterned glow on the wall when lit. Lighting hardware is enclosed behind the mirror and calls for a 40 watt, circular T5 energy-saving florescent bulb (included with purchase).
